

## Overall Analysis

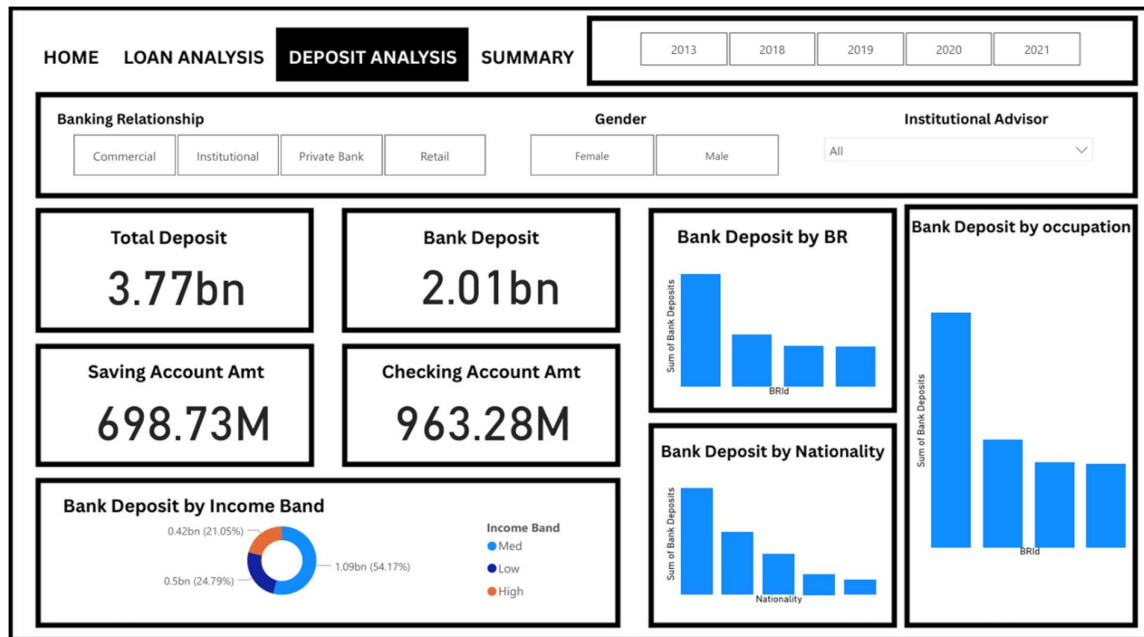

This page gives an overview of the total bank loans and deposits across different years (2013–2021). It highlights gender-wise distribution (Female vs Male) and shows overall loan and deposit values. The total loan amount is 4.38bn, while deposits are 3.77bn, with breakdowns into smaller segments like 963.28M and 698.73M. It provides a snapshot of trends and key numbers.

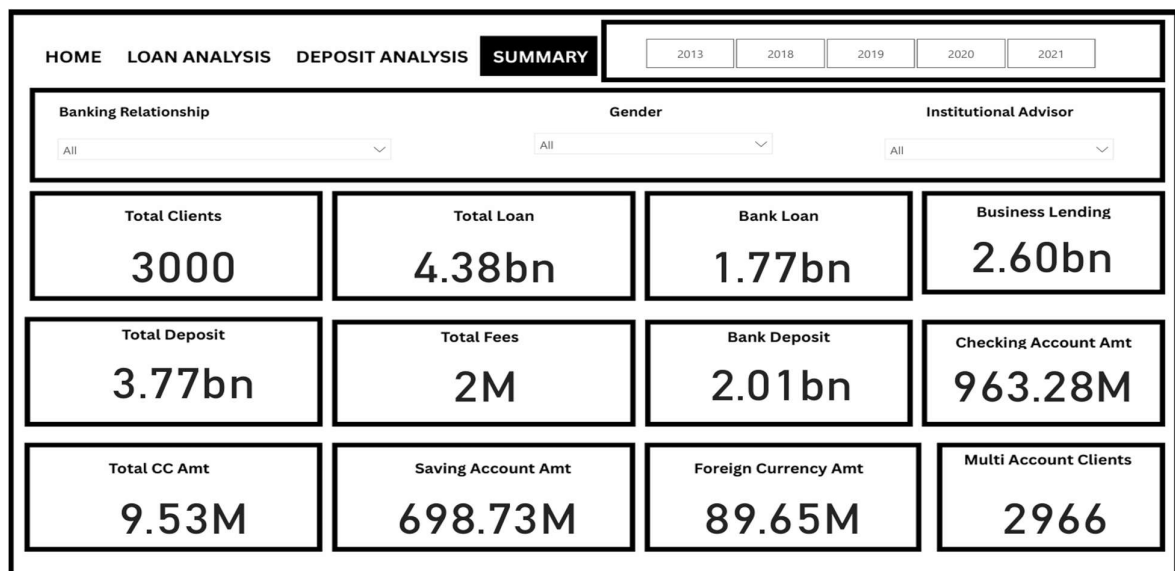

This page dives deeper into Bank Loans. It shows the loan distribution over years (2013–2021) and categorizes them by Income Bands (Low, Medium, High). Percentages are included, with Medium

income accounting for the largest share (53.12%). Additional filters are available for Nationality and Bank Type (Commercial, Institutional, Private, Retail), along with gender distribution.

This page focuses on Bank Deposits. Similar to loans, it presents data by year and Income Band with percentages (Medium: 54.17%, Low: 24.79%, High: 21.05%). Deposits are segmented by nationality, gender, and bank type, showing a comprehensive view of where deposits originate. It complements the loan data for a balanced financial analysis.

The last page summarizes the overall data. It consolidates loans (4.38bn) and deposits (3.77bn) with further segmented figures (1.77bn, 2.01bn, 963.28M, etc.) Additional statistics such as total customers (3000) and yearly variations (2013–2021) are displayed. A small metric like 2966 seems to represent a refined customer or transaction count, providing a final snapshot of the dashboard.
